### Notes

**Structurally Deficient (SD):** This term was previously defined in [www.fhwa.dot.gov/bridge/0650dsup.cfm](http://www.fhwa.dot.gov/bridge/0650dsup.cfm) as having a condition rating of 4 or less for Item 58 (Deck), Item 59 (Superstructure), Item 60 (Substructure), or Item 62 (Culvert), OR having an appraisal rating of 2 or less for Item 67 (Structural Condition) or Item 71 (Waterway Adequacy). Effective Jan. 1, 2018, FHWA changed the definition of structurally deficient bridges. This term will be defined in accordance with the [Pavement and Bridge Condition Performance Measures final rule](#), published in January of 2017, as a classification given to a bridge which has any component elements – the deck, superstructure, substructure or culverts – rated in poor or worse condition [a rating code of 4 or less].

**Good (G), Fair(F), Poor(P):** Bridge Condition is determined by the lowest rating of National Bridge Inventory (NBI) condition ratings for Item 58 (Deck), Item 59 (Superstructure), Item 60 (Substructure), or Item 62 (Culvert). If the lowest rating is greater than or equal to 7, the bridge is classified as Good; if it is less than or equal to 4, the classification is Poor. Bridges rated 5 or 6 are classified as Fair.
