Notes: This analyzes Gross Domestic Product (GDP) for counties with county governments, which is based on where production occurs rather than where workers live. Medium-sized counties have populations between 50k and 500k residents. Percent change is calculated using the equation $((\text{new val} - \text{old val}) / \text{old val}) \times 100$. During the Great Recession, GDP reached its lowest point in Q2 of 2009. **Sources:** Bureau of Economic (BEA) - Gross Domestic Product Data by County, 2021. U.S. Census Bureau - 2021 Population Estimates Program (PEP). Bureau of Labor Statistics - Local Area Unemployment Statistics (LAUS), 2021.
